

PRATHAMESH SABLE

Associate Product Manager | Technical Product & Business Analysis

Pune, Maharashtra | +91 93076 99044 | prathameshsspatil2000@gmail.com | LinkedIn | Product Portfolio | GitHub

PROFILE

Product-minded IT engineer with 15 months of enterprise technology experience and end-to-end ownership of two working Android products. Combines problem framing, PRDs and acceptance criteria with hands-on technical delivery, SQL/BI analysis, cost modelling, release planning and physical-device validation. Seeking APM and technical product roles at the intersection of users, business and engineering.

PRODUCT EXPERIENCE

Co-Founder & Product Lead — HomeyB 2026–Present

Hyperlocal social discovery | React Native, TypeScript, Firebase, Cloud Functions, AdMob

- Converted a hyperlocal networking concept into a working Android product spanning radius-based Nearby discovery, location Hives, Highlights, connections, private chat, push notifications and safety workflows.
- Defined the product trade-off between freshness, trust and cost: replaced unverifiable online status with a 15-minute recent-presence lease, five-minute location-aware cache and real-time updates only for high-value interactions.
- Led dependency and two-device acceptance testing across discovery, radius changes, real-time messaging, notifications, offline recovery and permissions; documented risks, production gaps and Play release readiness.
- Designed a low-interruption native-ad strategy for a free India-focused product and modelled infrastructure scenarios from 100 to 100,000 daily active users.

Independent Product Builder — Parky 2026–Present

Private offline parking-memory app | React Native, Expo, SQLite, Android integrations

- Took Parky from JTBD and MVP definition to a standalone Android app that samples fresh GPS readings, communicates accuracy and guides users back through offline compass and distance.
- Made explicit scope decisions across automatic versus user-controlled saving, embedded maps versus offline guidance and cloud convenience versus local-only privacy.
- Reduced capture friction through an Android Quick Settings tile, Home Screen widget and launcher shortcuts; produced a PRD/BRD, user stories, acceptance criteria, roadmap, KPI framework, research plan and evidence register.

PROFESSIONAL EXPERIENCE

Assistant System Engineer — Tata Consultancy Services (TCS) May 2024–Aug 2025

Enterprise Technology Operations, Reporting & Analysis | Mumbai

- Produced Excel and Power BI reporting for storage utilisation and CPU metrics, translating operational data into decision-ready infrastructure insights.
- Developed SQL queries and recurring data-extraction workflows to improve reporting accuracy and turnaround for technical stakeholders.
- Investigated production incidents using system-performance evidence, documented findings and supported root-cause analysis in an SLA-controlled environment.
- Coordinated with technical stakeholders during maintenance, service restoration and operational changes across business-critical enterprise data platforms.

CORE SKILLS

Product: Product discovery, JTBD, PRDs, user stories, acceptance criteria, prioritisation, roadmaps, KPI/funnel design, competitive analysis, monetisation and cost trade-offs, Agile/Scrum

Analysis: SQL, Power BI, DAX, Power Query, Excel, data modelling, KPI reporting, Python (Pandas, NumPy, Scikit-learn)

Technical: React Native, TypeScript/JavaScript, Firebase, Cloud Functions, REST APIs, Git/GitHub, SQL, enterprise data platforms, Linux, AWS EC2 fundamentals

EDUCATION & SELECTED CREDENTIALS

Bachelor of Engineering, Information Technology 2019–2023

Bharati Vidyapeeth College of Engineering, Navi Mumbai

Coursera: IBM Product Manager Specialization; Advanced Business Analysis: Elicitation & Analysis; Customer Analytics (University of Pennsylvania); IBM Agile Development & Scrum; IBM Data Engineering; IBM Cloud Computing.
