

PRATHAMESH SABLE

Technical Business Analyst | Product Operations Analyst

Pune, Maharashtra | +91 93076 99044 | prathameshsspatil2000@gmail.com | LinkedIn | Product Portfolio | GitHub

PROFILE

Technical Business Analyst with 15 months of enterprise technology operations experience and hands-on ownership of two Android product initiatives. Translates ambiguous needs into requirements, process flows, user stories, acceptance criteria and validation plans, supported by SQL, Power BI, Excel and software-delivery knowledge. Strong fit for Technical BA, Product Operations, Junior Product Analyst and data-enabled business roles.

PROFESSIONAL EXPERIENCE

Assistant System Engineer — Tata Consultancy Services (TCS) May 2024–Aug 2025

Enterprise Technology Operations, Reporting & Analysis | Mumbai

- Analysed storage utilisation and CPU metrics and produced Excel/Power BI reports that made infrastructure health and capacity information easier for stakeholders to review.
- Developed complex SQL queries and recurring extraction workflows for operational reporting, validation and investigation.
- Supported business-critical enterprise data platforms, applying production-risk, change, continuity and operational-control practices.
- Investigated performance and incidents using system evidence, documented findings and supported root-cause analysis in an SLA-controlled L2 environment.
- Worked between operations teams and technical stakeholders, converting system metrics and incidents into clear status, risk and action communication.

SELECTED PRODUCT & BA WORK

Co-Founder & Product Lead — HomeyB 2026–Present

Hyperlocal social discovery | React Native, TypeScript, Firebase, Cloud Functions

- Decomposed the product into requirements and end-to-end journeys for geospatial discovery, radius selection, Hives, Highlights, connections, chat, notifications, reporting and account safety.
- Analysed Firebase usage drivers and redesigned presence around location-aware caching and a 15-minute discovery lease; removed per-connection presence reads/listeners while preserving real-time messaging.
- Defined acceptance scenarios and executed two-device UAT covering permissions, offline recovery, discovery, messaging, push notifications and failure paths; maintained production-readiness and cost documentation.

Independent Product Builder — Parky 2026–Present

Offline parking-memory Android app | React Native, Expo, SQLite

- Translated “help me find my parked vehicle” into functional/non-functional requirements covering GPS uncertainty, permissions, local persistence, contextual clues, sensors and Android entry points.
- Produced a BRD/PRD, user stories, Given/When/Then acceptance criteria, process flows, business rules, traceability, CRUD/RACI matrices, risk register, KPI framework and prioritised roadmap.
- Delivered and physically validated a standalone, local-only MVP with SQLite storage, best-sample GPS capture, optional clue/photo and offline compass guidance.

CORE SKILLS

Business Analysis: Requirements elicitation, BRD/FRD/PRD, functional and non-functional requirements, user stories, acceptance criteria, process mapping, gap/impact analysis, traceability, UAT, risk and dependency tracking
Data & Reporting: Advanced SQL, Power BI, DAX, Power Query, Excel pivot tables/formulas, KPI definitions, data modelling, validation, Python (Pandas, NumPy)
Technology & Delivery: SQL, enterprise data platforms, Linux/Unix, Agile/Scrum, React Native, TypeScript/JavaScript, Firebase, REST APIs, Git/GitHub, AWS EC2 fundamentals

EDUCATION & SELECTED CREDENTIALS

Bachelor of Engineering, Information Technology 2019–2023

Bharati Vidyapeeth College of Engineering, Navi Mumbai

Coursera: IBM Product Manager Specialization; Advanced Business Analysis: Elicitation & Analysis; Customer Analytics (University of Pennsylvania); IBM Agile Development & Scrum; IBM Data Engineering; IBM Cloud Computing.
